DAVIN PUTRA FIBRIAN

Full-Stack Developer & Automation Engineer | Site Reliability & AI Integration

davinfibrian@gmail.com | Tulungagung, East Java, Indonesia
GitHub: github.com/VinLvy | LinkedIn: davinpfbrn | Portfolio

PROFESSIONAL PROFILE

Informatics undergraduate and Full-Stack Developer & Automation Engineer with 2+ years of experience building web applications, automation pipelines, and Gemini-powered AI features, with a focus on site reliability and cloud infrastructure. Delivered **8 client websites** with Lighthouse scores above 90 and reached the national final of a business case competition (**BMNC 2026**). Focused on secure engineering (OWASP) and practical LLM integration. Open to SRE & Platform Engineering roles.

EDUCATION

Bachelor of Informatics Jul 2025 to Present
Universitas Bhinneka PGRI

- Coursework: Data Structures & Algorithms, Object-Oriented Design, Database Systems, Software Engineering.

Vocational High School, Software Engineering Jul 2022 to Jun 2025
SMKN 1 Boyolangu

- Specialized in full-stack web development, with capstone projects in PHP architecture and relational database design.

WORK EXPERIENCE

Student Assistant (Asdos), E-SCM Research Project Aug 2026 to Sep 2026
Universitas Bhinneka PGRI

- Built a web-based **E-Supply Chain Management** system (**Laravel 11, MySQL**) for the marble and onyx SME cluster in Tulungagung, using UD Cahaya Onix and UD Putra Abadi as field case studies.
- Delivered modules for raw material and stock tracking, digital work orders (SPK) across production stations with 2-stage QC, distribution and packing checklists, and **role-based access** for four user roles.
- Developed a **FastAPI** forecasting microservice (Statsmodels, Scikit-Learn) for raw material demand estimation, and integrated **Midtrans** payments (QRIS, virtual account, e-wallet) into a multi-SME checkout.

Fullstack Web Developer Intern Jun 2024 to Dec 2024
Elecomp

- Built full-stack features in **PHP/Laravel** and HTML/CSS/JS within a 6-person agile team, cutting sprint delivery time by **20%** through reusable components.
- Implemented on-page SEO (structured metadata, semantic markup, Core Web Vitals), lifting organic search visibility by **25%** across client sites.
- Delivered **8 company profile websites** (CodeIgniter 4, MySQL) with lazy-loaded media, Schema.org markup, and Lighthouse scores above 90.
- Onboarded incoming interns on codebase architecture and **cPanel deployment** workflows.

PROJECTS

BatikChain: Blockchain Product Authentication Platform Oct 2025 to Dec 2025

- Led blockchain development in a 2-person team representing ZYNTRA at **Infinity Hackathon OJK 2025**, a national competition under Indonesia's Financial Services Authority.
- Built and deployed **ERC-721 smart contracts** on Ethereum for on-chain product registration, metadata storage, and provenance tracking for artisan batik.
- Developed the **React / Next.js** frontend with **Ethers.js**, enabling QR-code consumer verification directly against the contract.
- Applied OpenZeppelin **Ownable** access control and reviewed contract logic against reentrancy and other OWASP Smart Contract Top 10 risks.

ReLife RPG: AI-Powered Gamified Life Tracker Jan 2026 to Mar 2026

- Shipped a full-stack life-tracking app (**React, TypeScript, Vite, Supabase PostgreSQL**) where daily journal entries are analyzed by **Gemini 2.5 Flash**.
- Designed a structured **LLM prompt pipeline** that converts free-text journals into typed stat-delta objects, driving a leveling engine across 6 RPG attributes with class and title unlocks.

- Secured the app with **Supabase JWT authentication** and automatic session timeout; built an animated UI with Framer Motion and a live Recharts radar chart.

AntiFlow: AI Content Automation Engine Jul 2025 to Sep 2025

- Built a pipeline (**Next.js, FastAPI**) that turns a single topic into a complete YouTube asset kit: script, visual prompts, and voiceover.
- Used **Gemini 2.5 Flash** for structured scriptwriting and **Edge TTS** for narration, with AI logic and file handling in separate backend modules.
- Kept infrastructure cost at zero by running entirely on free-tier APIs.

Point of Sales (POS) System Jan 2025 to Feb 2025

- Delivered a **Laravel 11** and MySQL POS with real-time inventory tracking across product categories.
- Automated PDF/CSV report generation with **Laravel Queues** and scheduled tasks, reducing accounting reconciliation workload by **40%**.
- Implemented role-based access (Spatie Permissions) and a **REST API** for third-party POS hardware integration.

HONORS & AWARDS

4th Place & National Finalist, BMNC 2026 Business Case Competition Oct 2026

Business Management Network (BMN) Institute and Forum Manajemen Indonesia, East Java

- Advanced to the national final as one of five finalist teams, presenting a national franchise expansion and global market-entry strategy for a 75-year-old automotive service brand.
- Built the financial feasibility model (DCF, NPV/IRR, sensitivity analysis) and defended finance and operations questions before the jury panel.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, Tailwind CSS, Framer Motion, Recharts, Vite
Backend	Laravel, CodeIgniter 4, FastAPI, PHP, Python, Node.js, REST API Design
AI / LLM	Google Gemini API, Prompt Engineering, Structured Output Design, Edge TTS
Database	MySQL, PostgreSQL, Supabase
DevOps / Tools	Git, GitHub Actions, Vercel, Docker, Postman, CI/CD
Security	JWT, Supabase Auth, Role-Based Access Control, OWASP Smart Contract Top 10
Blockchain / Web3	Solidity, ERC-721, ERC-20, Ethereum, Ethers.js, Hardhat, OpenZeppelin, IPFS, MetaMask

LANGUAGES

Indonesian: Native **English**: Conversational
